**Peer to Peer** Michel Bauwens, Vasilis Kostakis, Alex Pazaitis, 2019-03-20 Not since Marx identified the manufacturing plants of Manchester as the blueprint for the new capitalist society has there been a more profound transformation of the fundamentals of our social life. As capitalism faces a series of structural crises, a new social, political and economic dynamic is emerging: peer to peer. What is peer to peer? Why is it essential for building a commons-centric future? How could this happen? These are the questions this book tries to answer. Peer to peer is a type of social relations in human networks, as well as a technological infrastructure that makes the generalization and scaling up of such relations possible. Thus, peer to peer enables a new mode of production and creates the potential for a transition to a commons-oriented economy.

*Brave New Work* Aaron Dignan, 2019-02-19 “This is the management book of the year. Clear, powerful and urgent, it's a must read for anyone who cares about where they work and how they work.” —Seth Godin, author of *This is Marketing* “This book is a breath of fresh air. Read it now, and make sure your boss does too.” —Adam Grant, New York Times bestselling author of *Give and Take*, *Originals*, and *Option B* with Sheryl Sandberg When fast-scaling startups and global organizations get stuck, they call Aaron Dignan. In this book, he reveals his proven approach for eliminating red tape, dissolving bureaucracy, and doing the best work of your life. He's found that nearly everyone, from Wall Street to Silicon Valley, points to the same frustrations: lack of trust, bottlenecks in decision making, siloed functions and teams, meeting and email overload, tiresome budgeting, short-term thinking, and more. Is there any hope for a solution? Haven't countless business gurus promised the answer, yet changed almost nothing about the way we work? That's because we fail to recognize that organizations aren't machines to be predicted and controlled. They're complex human systems full of potential waiting to be released. Dignan says you can't fix a team, department, or organization by tinkering around the edges. Over the years, he has helped his clients completely reinvent their operating systems—the fundamental principles and practices that shape their culture—with extraordinary success. Imagine a bank that abandoned traditional budgeting, only to outperform its competition for decades. An appliance manufacturer that divided itself into 2,000 autonomous teams, resulting not in chaos but rapid growth. A healthcare provider with an HQ of just 50 people supporting over 14,000 people in the field—that is named the “best place to work” year after year. And even a team that saved \$3 million per year by cancelling one monthly

meeting. Their stories may sound improbable, but in *Brave New Work* you'll learn exactly how they and other organizations are inventing a smarter, healthier, and more effective way to work. Not through top down mandates, but through a groundswell of autonomy, trust, and transparency. Whether you lead a team of ten or ten thousand, improving your operating system is the single most powerful thing you can do. The only question is, are you ready?

*The Handbook of Peer Production* Mathieu O'Neil, Christian Pentzold, Sophie Toupin, 2021-01-20 The definitive reference work with comprehensive analysis and review of peer production Peer production is no longer the sole domain of small groups of technical or academic elites. The internet has enabled millions of people to collectively produce, revise, and distribute everything from computer operating systems and applications to encyclopedia articles and film and television databases. Today, peer production has branched out to include wireless networks, online currencies, biohacking, and peer-to-peer urbanism, amongst others. The Handbook of Peer Production outlines central concepts, examines current and emerging areas of application, and analyzes the forms and principles of cooperation that continue to impact multiple areas of production and sociality. Featuring contributions from an international team of experts in the field, this landmark work maps the origins and manifestations of peer production, discusses the factors and conditions that are enabling, advancing, and co-opting peer production, and considers its current impact and potential consequences for the social order. Detailed chapters address the governance, political economy, and cultures of peer production, user motivations, social rules and norms, the role of peer production in social change and activism, and much more. Filling a gap in available literature as the only extensive overview of peer production's modes of generating informational goods and services, this groundbreaking volume: Offers accessible, up-to-date information to both specialists and non-specialists across academia, industry, journalism, and public advocacy Includes interviews with leading practitioners discussing the future of peer production Discusses the history, traditions, key debates, and pioneers of peer production Explores technologies for peer production, openness and licensing, peer learning, open design and manufacturing, and free and open-source software The Handbook of Peer Production is an indispensable resource for students, instructors, researchers, and professionals working in fields including communication studies, science and technology studies, sociology, and management studies, as well as those interested in the network information economy, the public domain, and new forms of organization and networking.

*Understanding Social Enterprise* Rory Ridley-Duff, Mike Bull, 2015-10-31 The emergence of social enterprises over the past 35 years has been an exciting and significant development in the economy at a local, national and international level.

Genetic Programming Theory and Practice II Una-May O'Reilly, Tina Yu, Rick Riolo, Bill Worzel, 2006-03-16 The work described in this book was first presented at the Second Workshop on Genetic Programming, Theory and Practice, organized by the Center for the Study of Complex Systems at the University of Michigan, Ann Arbor, 13-15 May 2004. The goal of this workshop series is to promote the exchange of research results and ideas between those who focus on Genetic Programming (GP) theory and those who focus on the application of GP to various re- world problems. In order to facilitate these interactions, the number of talks and participants was small and the time for discussion was large. Further, participants were asked to review each other's chapters before the workshop. Those reviewer comments, as well as discussion at the workshop, are reflected in the chapters presented in this book. Additional information about the workshop, addendums to chapters, and a site for continuing discussions by participants and by others can be found at <http://cscs.umich.edu:8000/GPTP-20041>. We thank all the workshop participants for making the workshop an exciting and productive three days. In particular we thank all the authors, without whose hard work and creative talents, neither the workshop nor the book would be possible. We also thank our keynote speakers Lawrence (Dave) Davis of NuTech Solutions, Inc., Jordan Pollack of Brandeis University, and Richard Lenski of Michigan State University, who delivered three thought-provoking speeches that inspired a great deal of discussion among the participants.

A story that reveals new possibilities and points toward an optimistic alternative to the current situation. Citizens presents just such a story.' - Tim Brown, Chair of IDEO and author of Change By Design 'The shift from consumer to citizen is a truly big idea. If you're in a position of strategic influence, I strongly recommend you engage with this and consciously explore what it might mean for your organisation.' - Dame Fiona Reynolds DBE, Former Director General, National Trust, and Trustee, BBC 'There is such a thing as an idea whose time has come. Karl Polanyi and the Contemporary Political Crisis Peadar Kirby, 2020-12-10 Has politics reached breaking point? Rather than defending liberalism or abandoning it, how can a socially just and ecological alternative be built? Peadar Kirby investigates the causes of our current multifaceted global crisis by drawing on the work of Karl Polanyi. This book explores Polanyi's theory that social disruptions result from the attempt to run society according to the rules of the market. Drawing on these ideas, it outlines pathways towards an alternative future that overcome weaknesses in Marxism. Linking the ecological, political and socio-economic crises, Kirby identifies that an alternative socio-ecological model is emerging, consistent with the insights of Polanyi. Karl Polanyi and the Contemporary Political Crisis is an urgent intervention into key debates on the future of politics, on the low-carbon transition, on automation and on the emerging world order.

**Blockchain and the Commons** Vangelis Papadimitropoulos, 2022-11-24 Recent years have seen a surge of interest in 'the commons' based on a simple yet radical idea: great improvements in production and management could be achieved by reducing barriers to knowledge exchange and power-sharing. Ranging from meadows, forests and parks to language, open-source software (FLOSS and Blockchain) and 3D printers, the commons are distributed or common property resources/infrastructures that are self-managed by their user communities. While acknowledging the significant contributions that can be made through commons-based peer production, this book provides a critical examination of the commons with the aim of contributing to their long-term sustainability. In particular, the book examines the relation of Blockchain to the commons by illustrating the case study of the Commons Stack. Drawing on a range of interdisciplinary ideas and methodologies, the book argues that there are a number of economic and social barriers that are obstructing the wider reproduction of the commons. Problems with access to capital and training, the lack of entrepreneurial and managerial skills and the absence of institutional support from governments, larger co-ops and NGOs are some of the external difficulties facing the commons today. Meanwhile, localism, gated communities, vested interests, atavism, traditionalism, ideology, conflict, neo-conservatism and techno-elitism represent some of the internal contradictions inherent in the commons. Through overcoming these contradictions, the ultimate goal is to transform capitalism into the postcapitalism of the commons: the creation of a social economy self-organised around the commons. This book provides vital reading for anyone interested in the commons, from economics, techno-politics and across the social sciences.

Brave New Work. Siete pronti a reinventare la vostra organizzazione? Aaron Dignan, 2023-09-18 Quando le startup e le organizzazioni globali in rapida espansione si bloccano, chiamano Aaron Dignan. E lui ha scoperto che tutte, da Wall Street alla Silicon Valley, sono affossate dalle stesse frustrazioni: mancanza di fiducia, colli di bottiglia nel processo decisionale, funzioni e team a silos, sovraccarico di riunioni ed e-mail, fatica nel redigere il budget, pensiero a breve termine. A

rallentarci e farci sentire meno umani non sono le persone, né i leader. Bensì il nostro Sistema Operativo, ossia i principi e le prattiche che definiscono la nostra cultura. Asfissiato da burocrazia, gerarchia e compliance, il nostro modo di lavorare non funziona più. Siete pronti a ridargli respiro? Il primo passo è riconoscere che le organizzazioni non sono macchine da programmare e controllare ma sistemi umani complessi, ricchi di potenziale che non aspetta altro che di essere liberato. Immaginate: • una banca che ha abbandonato il budgeting tradizionale e sbaragliato i competitor. • un'azienda di elettrodomestici che si è divisa in 2000 unità operative indipendenti generando una rapida crescita. • un team che ha risparmiato 3 milioni di dollari all'anno cancellando una singola riunione a cadenza mensile... Le loro storie possono sembrare inverosimili, ma in Brave New Work scoprirete come queste e altre organizzazioni stiano inventando un modo di lavorare più intelligente, sano ed efficace grazie a un'ondata di autonomia, fiducia e trasparenza. Che siate a capo di un team di dieci o diecimila persone, migliorare il vostro Sistema Operativo è la cosa più potente che possiate fare.

*Proleptic Leadership on the Commons* Randal Joy Thompson, 2020-10-22 Will capitalism give way to a commons-centric society as many scholars and activists predict? Viewing the commons as a vehicle for a new world order, Randal Joy Thompson proposes 'proleptic leadership', which envisions how leaders will continue to be essential as the custodians of responsible agency and conscious choice.

**Crisis and Terror in the Age of Anxiety** Luke Howie, Perri Campbell, 2017-04-20 This book confronts the issues young people face growing up in the confusion and anxiety of today's highly global society. Young people face their futures consumed with feelings of doubt, uncertainty and ambivalence. The Global Financial Crisis and the rise of the Islamic State means young people are transitioning into adulthood in a time that we call an age of anxiety. They may be the first generation to have fewer opportunities than their parents yet, despite this, they are learning to imagine other kinds of futures. These are futures where economic collapse provides opportunities for entrepreneurialism and innovation, where Islamic State does not need to pose a clear and present danger, and where political action provides hope for a better world. Dealing with the current political and economic climate and progressive campaigns such as Black Lives Matter, Howie and Campbell tackle some of the biggest threats to the future of society. An innovative and wide-reaching study, this book will be of particular interest to scholars of human geography, disaster studies, politics, and sociology.
